Garage Doors

Trinity *Monitoring*

Enhance Your Offering with Garage Door Integration

Trinity is the first interactive security and home automation company to offer a fully integrated garage door solution. In partnership with Linear® and LiftMaster®, our solution is compatible with most commercially sold garage door openers.

You can get a complete and convenient home automation solution that will help better manage access to any property.

Linear Z-Wave Garage Door Controller

With Linear's easy-to-install Z-Wave Garage Door Controller, you can have simple, quick access to garage door control through your Alarm.com app. The Linear Garage Door Controller is compatible with the the latest versions of 2GIG, DSC and Interlogix panels.

With Garage Door Integration You Can:

Check to see if garage doors are closed

Remotely open and close garage doors

Automatically have garage doors close when system is armed

Receive alerts and actionable notifications if garage doors are left open

LiftMaster MyQ®

Using LiftMaster's patented two-way communication, MyQ Technology, in either the MyQ Garage or MyQ Internet Gateway, easily upgrade your garage door opener from any of the following brands:

- LiftMaster-Chamberlain
- Master Mechanic
- True Value
- Wayne Dalton
- Linear
- Do-It-Yourself
- Stanley
- Craftsman
- Raynor
- Genie

Flexible Hardware Options
